CONTENTS OF VOLUME 78

No. 1, October 1989

R. Refinetti, H.J. Carlisle and S.M. Horvath (U.S.A.): Respiratory gaseous exchange in the Zucker rat 1

I.H. Sarelius (U.S.A.): Microcirculation in striated muscle after acute reduction in systemic hematocrit 7

P. Pityn, M.J. Chamberlain, T.M. Fraser, M. King and W.K.C. Morgan (Canada): The topography of particle deposition in the human lung 19

J.P. Mortola, R. Rezzonico and C. Lanthier (Canada): Ventilation and oxygen consumption during acute hypoxia in newborn mammals: a comparative analysis 31

H. Kobayashi, B. Pelster and P. Scheid (F.R.G.): Water and lactate movement in the swimbladder of the eel, *Anguilla anguilla* 45

H. Kobayashi, B. Pelster and P. Scheid (F.R.G.): Solute back-diffusion raises the gas concentrating efficiency in counter-current flow 59

K. Ishii, K. Ishii, J.-C. Massabuau and P. Dejours (France): Oxygen-sensitive chemoreceptors in the branchio-cardiac veins of the crayfish, *Astacus leptodactylus* 73

F.L. Powell and A.T. Gray (U.S.A.): Ventilation–perfusion relationships in alligators 83

R.C. Schroter, D. Robertshaw and R. Zine Filali (U.K., U.S.A., Morocco): Brain cooling and respiratory heat exchange in camels during rest and exercise 95

M. Ishii, H. Iijima, U. Katsumata, Y. Shimizu, H. Inoue, H. Sasaki, T. Takishima, H. Ishihara, T. Kobayashi, H. Ito and H. Inaba (Japan): Direct write-out of particle size distribution of inhaled aerosol deposition using a laser scattering method 107

No. 2, November 1989

P. Lejeune, J.-L. Vachiery, M. Leeman, S. Brimioulle, R. Hallemans, C. Melot and R. Naeije (Belgium): Absence of parasympathetic control of pulmonary vascular pressure–flow plots in hyperoxic and hypoxic dogs 123

G.W. Shields, J.R. Sheller, J.H. Newman, S.S. Duke, A.W. Gillette, A.W. Malcom, B.O. Meyrick and K.L. Brigham (U.S.A.): Airway responsiveness in isolated perfused rat lungs: effect of thoracic irradiation 135

D.M. Ainsworth, C.A. Smith, S.W. Eicker, K.S. Henderson and J.A. Dempsey (U.S.A.): The effects of locomotion on respiratory muscle activity in the awake dog 145

D.M. Ainsworth, C.A. Smith, S.W. Eicker, K.S. Henderson and J.A. Dempsey (U.S.A.): The effects of chemical versus locomotory stimuli on respiratory muscle activity in the awake dog 163

M. Sasaki, M. Yamaya, W. Hida, M. Nakamura, T. Sasaki, H. Sasaki and T. Takishima (Japan): Effect of hypercapnia on ventilatory response to intravenous nicotine administration in anesthetized dogs 177

A.H. Jansen, S. Ioffe and V. Chernick (Canada): Influence of naloxone on fetal breathing and the respiratory response to hypercapnia 187

Z. Arad (Israel): Changes in eggshell water vapour conductance during shell formation in the chicken 197

R.A. Furilla and D. Bartlett, Jr. (U.S.A.): Intrapulmonary CO_2 inhibits inspiration in garter snakes 207

M.J. Berry, P.J. Puntenney and L.A. Sandt (U.S.A.): Ventilatory responses during varied stride and pedal frequencies 219

H. Malte (Denmark): Pressure/flow relations in the interlamellar space of fish gills: theory and application in the rainbow trout 229

T. Kochi, J. H. T. Bates, S. Okubo, E. S. Petersen and J. Milic-Emili (Canada): Respiratory mechanics determined by flow interruption during passive expiration in cats 243
G. L. Warren, K. J. Cureton and P. B. Sparling (U.S.A.): Does lung function limit performance in a 24-hour ultramarathon? 253

No. 3, December 1989

P-C. Lucy Hou and W. W. Burggren (U.S.A.): Interaction of allometry and development in the mouse *Mus musculus:* heart rate and hematology 265
S. Ganesan, S. J. Lai-Fook and S. Schürch (U.S.A., Canada): Alveolar liquid pressures in non-edematous and kerosene-washed rabbit lungs by micropuncture 281
M. S. Ludwig, S. Bellofiore, W. S. Powell and J. G. Martin (Canada): Regional variability in the response of collateral resistance to histamine in the dog: effects of cyclooxygenase inhibition 297
J. J. Greer and R. B. Stein (Canada): Length changes of intercostal muscles during respiration in the cat 309
D. J. Paterson, P. A. Robbins and J. Conway (U.K.): Changes in arterial plasma potassium and ventilation during exercise in man 323
M. A. Douse, F. L. Powell, W. K. Milsom and G. S. Mitchell (U.S.A., Canada): Temperature effects on pulmonary receptor responses to airway pressure and CO_2 in *Alligator mississippiensis* 331
M. Ramonatxo, J. Mercier and C. Prefaut (France): Relationship between aerobic physical fitness and ventilatory control during exercise in young swimmers 345
R. C. Schroter and N. V. Watkins (U.K.): Respiratory heat exchange in mammals 357
J. H. T. Bates, F. Shardonofsky and D. E. Stewart (Canada): The low-frequency dependence of respiratory system resistance and elastance in normal dogs 369
D. G. Davies (U.S.A.): Distribution of systemic blood flow during anoxia in the turtle, *Chrysemys scripta* 383
C. N. Olievier, A. Berkenbosch and J. DeGoede (The Netherlands): Almitrine and the peripheral ventilatory response to CO_2 in hyperoxia and hypoxia 391
